PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building fintech and Web3 products with React, Next.js, and TypeScript, serving **1,000+ daily active users**. Owned end-to-end frontend delivery for real-time, multi-chain applications, from UI and API integration to testing and production monitoring. Hands-on backend experience with Node.js, Express.js, and PostgreSQL, including building API endpoints, publishing API documentation, and integrating payment subscriptions. Works directly with founders and product teams, coordinates releases, reviews code, and mentors frontend developers.

TECHNICAL SKILLS

Core Web Technologies	HTML, CSS, SCSS, JavaScript (ES6+), TypeScript
Frontend Frameworks	React, Next.js, Vue.js, Nuxt.js
Backend	Node.js, Express.js, PostgreSQL
State Management	Zustand, TanStack Query, React Context API
Forms & Validation	Zod, React Hook Form
UI Libraries	Ant Design, shadcn/ui, Material UI
Styling	Tailwind CSS, SCSS, Styled Components
Testing & Delivery	Playwright, CI/CD, Sentry
AI-Assisted Development	Cursor IDE, Claude, Claude Skills, Codex, Model Context Protocol (MCP)

WORK EXPERIENCE

Nimbus Tech JSC (Product-focused Startup) **03/2022 - 06/2026**
Software Engineer getnimbus.io
Contract 03/2022 - 03/2023 | Full-time 04/2023 - 06/2026

Products: GetNimbus | LP Agent
Domain Knowledge: Blockchain-based fintech, including DeFi, digital asset management, liquidity protocols, on-chain data, and real-time market infrastructure.

- Owned end-to-end frontend delivery for **GetNimbus** and **LP Agent** using **Next.js**, TypeScript, and **Tailwind CSS**, serving **1,000+ daily active users** and covering authentication, UI, API integration, real-time data, and responsive behavior.
- Built multi-chain portfolio tracking across **Solana, Sui, TON, and Bitcoin** with **50+ integrated protocols**, giving users one interface for wallet holdings, DeFi positions, token performance, NFTs, and yield opportunities.
- Cut portfolio data load time from **1-2 minutes to 600-700 ms** and reduced API requests by **~70%** by designing a **TanStack Query** caching strategy for long-term holdings, with targeted query invalidation when users need fresh data.
- Developed real-time dashboards and candlestick charts powered by **WebSocket** price feeds, showing live token prices, portfolio value, PnL, fees, liquidity pools, TVL, and volume; built LP Agent views for position history, fee and PnL analytics, and pool discovery across Meteora, Orca, Raydium, and Uniswap.
- Reduced user-facing production errors by **60%** by setting up the frontend **CI/CD pipeline**, writing **Playwright** end-to-end tests for critical user flows, and monitoring each release with **Sentry** to fix edge cases surfaced by real user behavior.
- Worked directly with founders, product, and design teams to define requirements, break down tasks, and coordinate releases; reviewed code and mentored **2 frontend developers** on API integration, state management, and UI quality.
- Extended the platform on the backend by building **Express.js** endpoints, publishing interactive API documentation with **Mintlify**, and integrating **MoonPay** subscriptions and recurring payments.

Eastplayers (Software Outsourcing) **03/2022 - 03/2023**
Frontend Developer eastplayers.io

- Built an SEO-friendly cryptocurrency trading platform with **Next.js** for a **Singapore-based client**, serving **200+ daily active users**; collaborated with designers, product managers, and backend engineers, and used **TanStack Query** server-state caching to reuse fetched data and speed up page loads.
- Built a responsive **Admin Dashboard** with **React** for a fresh produce (fruit and vegetable) business, covering **order management, inventory, supplier management, and revenue reporting** to support its supply-chain operations.
- Created reusable components with **Ant Design** and **Tailwind CSS**, keeping interfaces consistent and simplifying maintenance across client projects.

JAMstack Vietnam (Software Outsourcing) **07/2021 - 10/2021**
Frontend Intern jamstackvietnam.com

- Built responsive, mobile-first, API-connected layouts using **Vue.js**, Tailwind CSS, and SCSS for client applications.
- Presented product features to clients and cross-functional teams during sprint reviews.
- Earned excellent internship evaluations and a full-time return offer.

EDUCATION

Ho Chi Minh City University of Technology (HCMUT) **2020 - 2023**
Control Engineering and Automation (Part-time Program)
Classification: Good

Cao Thang Technical College **2016 - 2019**
Control Engineering and Automation (Full-time Program)
Classification: Good

LANGUAGES

English: Intermediate working proficiency
