PROFESSIONAL SUMMARY

Frontend Developer with 5 years of experience building fintech and Web3 products using React, Next.js, and TypeScript. Proven experience owning end-to-end frontend delivery for real-time, multi-chain applications, from UI/UX and API integration to production monitoring. Skilled in collaborating directly with founders and product teams, coordinating releases, reviewing code, and mentoring frontend developers.

TECHNICAL SKILLS

Core Web Technologies	HTML, CSS, SCSS, JavaScript (ES6+), TypeScript
Frontend Frameworks	React, Next.js, Vue.js, Nuxt.js
Backend Exposure	Node.js, Express.js, PostgreSQL
State Management	Zustand, TanStack Query, React Context API
Forms & Validation	Zod, React Hook Form
UI Libraries	Ant Design, shadcn/ui, Material UI
Styling	Tailwind CSS, SCSS, Styled Components
AI-Assisted Development	Cursor IDE, Claude CLI, Model Context Protocol (MCP)

WORK EXPERIENCE

Nimbus Tech JSC (Product-focused Startup)

03/2022 - 06/2026

Software Engineer

getnimbus.io

Products: [GetNimbus](#) | [LP Agent](#)

Domain Knowledge: Blockchain-based fintech, including decentralized finance (DeFi), digital asset management, liquidity protocols, on-chain data, and real-time market infrastructure.

- Owned end-to-end frontend delivery for **GetNimbus** and **LP Agent** using **Next.js** and **Tailwind CSS**, covering authentication, UI/UX, API integration, real-time data handling, responsive behavior, and production monitoring with **Sentry**.
- Built multi-chain portfolio views for wallet holdings, DeFi positions, token performance, NFTs, and yield opportunities across ecosystems including Sui, Solana, TON, Bitcoin, and EVM networks.
- Developed real-time financial dashboards and candlestick charts using **WebSockets**, visualizing live token prices, portfolio value, PnL, fees, liquidity pools, TVL, and volume.
- Built LP Agent interfaces for portfolio monitoring, position history, fee and PnL analytics, pool discovery, and LP performance across protocols including Meteora, Orca, Raydium, and Uniswap.
- Integrated REST APIs and WebSocket streams with **TanStack Query** caching to deliver live prices, pool data, and position updates while reducing redundant requests and handling loading, error, and empty states.
- Worked directly with founders, product, and design teams to define requirements, break down tasks, coordinate releases, and translate complex Web3 data into responsive user experiences.
- Reviewed code and mentored **2 frontend developers** on API integration, UI/UX quality, state management, and resolving frontend issues.
- Extended platform capabilities by building **Express.js** endpoints, publishing interactive API documentation with **Mintlify**, and integrating **MoonPay** subscriptions and recurring payments.

Eastplayers (Software Outsourcing)
Frontend Developer

03/2022 - 03/2023
eastplayers.io

- Built reusable and maintainable frontend components using **Ant Design** and **Tailwind CSS**.
- Collaborated with designers, product managers, and backend engineers to build a scalable, SEO-friendly cryptocurrency exchange with **Next.js**.
- Implemented server-state caching with **TanStack Query** to improve loading performance and reduce latency.
- Built responsive interfaces for enterprise supply-chain management platforms using **React**.

JAMstack Vietnam (Software Outsourcing)
Frontend Intern

07/2021 - 10/2021
jamstackvietnam.com

- Built responsive, mobile-first layouts using **Vue.js**, **Tailwind CSS**, and **SCSS**.
- Integrated REST APIs with backend services.
- Received excellent internship evaluations and a full-time return offer.
- Presented product features to clients and cross-functional teams during sprint reviews.

EDUCATION

Bach Khoa University

2020 - 2023

Control Engineering and Automation (Part-time Program)
Classification: Good

Cao Thang Technical College

2016 - 2019

Control Engineering and Automation (Full-time Program)
Classification: Good

LANGUAGES

English: Intermediate working proficiency
