

NGUYEN NGOC THANH BINH

FRONT-END DEVELOPER

District 6, Hochiminh City ▪ 0397665660 ▪ binhnnt.98@gmail.com

LinkedIn: [linkedin.com/in/binh-nguyen-7295b1225](https://www.linkedin.com/in/binh-nguyen-7295b1225) ▪ Portfolio: binh98.vercel.app ▪ GitHub: github.com/binhnguyen2501

PROFESSIONAL SUMMARY

Front-end Developer with 5 years experience in building financial portfolio management applications and interacting with blockchain.

Experienced across the Front-end techstack with an optimal mindset for UI/UX. Skilled in leveraging AI tools like Cursor IDE, Claude CLI, and MCP to maximize development efficiency. Possesses foundational Back-end capabilities with a strong desire to progress into a full-scale Fullstack Engineer.

Proactively collaborates with Designers, Business Analysts, and Back-end cohorts to establish highly user-centric business logic.

JOB GOALS

Short Term Accumulate deep technical experience to step into a definitive Senior Front-end Developer role.

Long Term Systematically improve professional backend skills and competencies to fully mature into a comprehensive Full-stack Developer, fulfilling end-to-end organizational needs.

TECHNICAL SKILLS

AI-Assisted Development	Cursor IDE, Claude CLI, Model Context Protocol (MCP)
Programming Languages	HTML, CSS, SCSS, JavaScript (ES6+), TypeScript
Front-end Techstack	ReactJS/NextJS, VueJS/NuxtJS
Back-end Techstack	NodeJS, ExpressJS, PostgreSQL
State Management	Zustand, TanStack Query, React Context API
Form & Validation	Zod, React-Hook-Form
UI Libraries	Ant Design (AntD), Shadcn/UI, Material UI (MUI)
Styling Frameworks	TailwindCSS, SCSS, Styled Components

WORK EXPERIENCE

Nimbus Tech JSC <i>Software Engineer (Team Size: 5)</i>	03/2022 – 06/2026 getnimbus.io lpage.io
▪ Took full ownership of Front-end engineering for a multi-chain financial advisory and portfolio management application serving Web3 users across ecosystems like SUI, Solana, TON, etc., leveraging Next.js and TailwindCSS. ▪ Develop a user authentication module for a portfolio management application used across different blockchains. ▪ Redesigned the cross-device layout to significantly optimize mobile and desktop UI/UX fluidities. ▪ Structured a robust data-fetching and client-side caching framework utilizing TanStack Query (React Query), eliminating redundant API requests and maximizing global state consistency. ▪ Owned end-to-end features spanning pixel-perfect interface creation to seamless RESTful API architecture integration. ▪ Implemented high-performance, real-time candlestick tracking interfaces using WebSocket, allowing instant visualization of token prices, liquidity pools, and live portfolio rebalancing. ▪ Formulated API endpoints with ExpressJS to securely distribute cross-chain financial telemetry. ▪ Orchestrated the entire interface lifecycle for the LP Agent toolkit dedicated to liquidity providers on Solana. ▪ Designed interactive live product/API reference documentation hubs hosted via Mintlify. ▪ Developed an automated merchant subscription and recurring payment network via Moonpay integrations to monetize data feeds.	

- Triaged production hotfixes and sustained system availability within rapid-paced iteration cycles.

Tech stack Front-end: Next.js, TailwindCSS, Typescript, TanStack Query (React Query), Moonpay, Web3 library and SDKs.
Tech stack Back-end: NodeJS, ExpressJS, PogrestSQL.

Eastplayers

03/2022 – 03/2023

Front-end Developer (Team Size: > 20)

eastplayers.io

- Engineered modern, highly reusable, and maintainable modular front-end component configurations utilizing **Ant Design** and **TailwindCSS**.
- Partnered with multi-disciplinary crews of designers, product managers, and back-end engineers to implement a scalable, **SEO-friendly** cryptocurrency exchange built over **Next.js**.
- Integrated automated background data caching pipelines via **TanStack Query (React Query)** to accelerate paint cycles and eliminate latency.
- Designed and developed dynamic interface systems for fruit/vegetable warehouse supply-chain platforms built to flex across enterprise tiers using **ReactJS**.

Tech stack Front-end: ReactJS, NextJS, TanStack Query (React Query), TailwindCSS, Ant Design.

JAMstack Vietnam

07/2021 – 10/2021

Front-end Internship (Team Size: > 20)

jamstackvietnam.com

- Built responsive, mobile-first layouts using **VueJS**, **TailwindCSS**, and **SCSS** customized to target criteria.
- Integrated clean **RESTful API** data contracts securely with back-end application boundaries.
- Achieved exceptional marks during the term, culminating in a formal full-time permanent return offer.
- Actively demonstrated application features to clients and cross-functional teams during sprint reviews.

Tech stack Front-end: VueJS, TailwindCSS, SCSS.

EDUCATION

Bach Khoa University

2020 – 2023

Control Engineering and Automation (In-service Education)

- **Diploma:** Good Grade ▪ **GPA:** 6.5 / 10

Cao Thang Technical College

2016 – 2019

Control Engineering and Automation (Formal Education)

- **Diploma:** Good Grade ▪ **GPA:** 7.5 / 10

LANGUAGES

- **English Proficiency:** TOEIC 650 Certified
